

## **FIRE PREVENTION**

**October 2009**

The Rockwall Fire Department visited Rockwall Independent School District elementary schools in October to promote Risk Watch, a Safety and Fire Prevention program. Below are pictures of the obstacle course used to teach students how to respond to a smoke detector alert, feel a door for heat, stay low and go, and open a window for exiting a structure. Home safety plans and the importance of smoke detectors were addressed. Students were also taught how to call 911 and provide adequate information to first responders.
