STATE OF INSPECTION:				
<p>On _____, an inspector representing this firm inspected the preparation and installation of the foundation at the above referenced project address and found that it has been installed and prepared as specified in the City approved engineered drawings and details. This also includes the placement of the brick ledge as specified on the City approved engineered drawings. The plumbing, mechanical and electrical items within the foundation were also found to be compatible, and do not adversely affect or cause damage to one another.</p>
