- 1. Unless otherwise stated in the plans, flags attached to signs are
- 2. TCP (2-4b) shall be used only on projects that will be at a location
- 3. Existing pavement markings may remain in place for projects less than
- 4. The FORM ONE LINE LEFT (or RIGHT) sign may be used following the RIGHT (or LEFT) LANE CLOSED XXX FT sign. Spacing distance between
- 5. Downstream taper is optional. When used, it should be 100' minimum
- 6. For intermediate term situations, when it is not feasible to remove and restore pavement markings, the channelization must be made dominant by using a very clase spacing. This is especially important in locations of conflicting information, such as where traffic is directed over a double yellow centerline. In such locations a maximum channelizing device spacing of 10 feet is recommended. The 10 foot channelizing device spacing recommendation is intended for the area
