MEMORANDUM

TO: Dub Douphrate, P.E.
FROM: Dan C. Boutwell, AICP
SUBJECT: Potential Site of Convenience/Gasoline Service at Dalton Dr. & S.H. 205
DATE: October 13, 1993

In response to your request, we have reviewed the above referenced subject and offer the following comments. It is our understanding that the applicant wishes to add two (2) additional gasoline dispensers on the site.

1. The GR zoning district is very clear that only two (2) dispensers providing for a maximum of four (4) vehicles is permitted in this district. The conditional use permit for the GR District does not provide an opportunity to expand this use. Therefore it is my opinion that this use with more than two (2) dispensers may not be allowed under any condition in the GR zoning district.
2. The applicant need not pursue seeding relief from the Zoning Board of Adjustment. This is a "self-imposed" condition and does not fit the definition of a "hardship" as recognized by state law. In addition, the number of dispensers located on site are a matter of zoning, not area regulations. The Zoning Board of Adjustment is not the proper body to hear this issue.
3. Under the structure of the current zoning ordinances, the only recourse left to the applicant is to pursue rezoning of the property. "C" Commercial district permits service stations, without placing a limit on the number of dispensers permitted. However, in our opinion, it would not be consistent with the intent of the neighborhood nor the comprehensive plan to introduce "C" Commercial into this area.
4. The only option left to the applicant is to pursue changing the GR district to allow gasoline sales from more than two dispensers. If the applicant desires to pursue this option, then he should make a formal request to do so with the Planning and Zoning Commission.
5. As a matter of information. It is our opinion that any revisions to the GR district should occur in the Conditional Use section. It is our preliminary opinion that a maximum of four (4) dispensers and a maximum of eight (8) vehicles should be permitted. And prior approval of any such use a conditional use permit be obtained.

Planning and Zoning Commission
City of Rockwall

Dear Commissioners:

I would like to submit a request to the commission to consider amending the city ordinance of the General Retail District to provide a conditional use permit allowing four fuel dispensers which can service no more than eight vehicles at one time. The present ordinance for the General Retail District allows only two fuel dispensers which can service no more than four vehicles at one time. This is not sufficient to provide our expected needs. The updated site plan for the convenience store at State Highway 205 and FM 552 will indicate four fuel dispensers with ample room to service eight vehicles at one time. The plan will be submitted at a later date.

The 1992 traffic counts supplied by the State Department of Transportation (currently 6300 on SH 205 and in excess of 1400 of FM 552 within a 24 hour period) are projected to be 13,000 on SH 205 by the year 2000. This should quickly add credence to this request for change or exception.

An affirmative decision on this matter will be appreciated.

Sincerely,

Tom Shirey

FROM: Dan C. Boutwell, AICP
SUBJECT: P&Z 93-39-Z (Amendment to GR district)
DATE: January 7, 1994

Recently, the City analyzed the "GR" district as it relates to fuel pumping facilities. A request had been made to allow more fuel dispensers than what was currently permitted in the district. As a result of our analysis the following comments have been provided:

1. The GR zoning district is very clear that only two (2) fuel dispensers, providing for a maximum of four (4) vehicles, is permitted in this district. The conditional use permit for the GR District does not provide an opportunity to expand this use. Therefore it is our opinion that this use with more than two (2) dispensers may not be allowed under any condition in the GR zoning district.
2. An applicant may not pursue seeking relief from the Zoning Board of Adjustment in order to add more dispensers than what is allowed. That would constitute a "self-imposed" condition and does not fit the definition of a "hardship" as recognized by state law. In addition, the number of dispensers located on site are a matter of zoning, not area regulations. The Zoning Board of Adjustment is not the proper body to hear this issue.
3. Under the structure of the current zoning ordinances, the only recourse left to an applicant is to pursue rezoning of the property. "C" Commercial district permits service stations, without placing a limit on the number of dispensers permitted. However, in our opinion, it would not be consistent with the intent of the neighborhood nor the comprehensive plan to introduce "C" Commercial into many of the areas containing "GR" zoning.
4. The only option left to an applicant is to pursue changing the "GR" district to allow gasoline sales from more than two dispensers. It is our recommendation that any revisions to the GR district should occur in the Conditional Use section. It is also recommended that a maximum of four (4) dispensers and a maximum of eight (8) vehicles should be permitted. And prior approval of any such use as a conditional use permit should be obtained.

MEMORANDUM

TO: Dub Douphrate, P.E.
FROM: Dan C. Boutwell, AICP
SUBJECT: P&Z 93-39-Z (Amendment to GR district)
DATE: January 7, 1994

Recently, the City analyzed the "GR" district as it relates to fuel pumping facilities. A request had been made to allow more fuel dispensers than what was currently permitted in the district. As a result of our analysis the following comments have been provided:

1. The GR zoning district is very clear that only two (2) fuel dispensers, providing for a maximum of four (4) vehicles, is permitted in this district. The conditional use permit for the GR District does not provide an opportunity to expand this use. Therefore it is our opinion that this use with more than two (2) dispensers may not be allowed under any condition in the GR zoning district.
2. An applicant may not pursue seeking relief from the Zoning Board of Adjustment in order to add more dispensers than what is allowed. That would constitute a "self-imposed" condition and does not fit the definition of a "hardship" as recognized by state law. In addition, the number of dispensers located on site are a matter of zoning, not area regulations. The Zoning Board of Adjustment is not the proper body to hear this issue.
3. Under the structure of the current zoning ordinances, the only recourse left to an applicant is to pursue rezoning of the property. "C" Commercial district permits service stations, without placing a limit on the number of dispensers permitted. However, in our opinion, it would not be consistent with the intent of the neighborhood nor the comprehensive plan to introduce "C" Commercial into many of the areas containing "GR" zoning.
4. The only option left to an applicant is to pursue changing the "GR" district to allow gasoline sales from more than two dispensers. It is our recommendation that any revisions to the GR district should occur in the Conditional Use section. It is also recommended that a maximum of four (4) dispensers and a maximum of eight (8) vehicles should be permitted. And prior approval of any such use as a conditional use permit should be obtained.
